

# Devin Gleason Lambert

Entry Level .Net Developer

I am a technologist at heart, a deep love for technology is how I got here. I have been dismantling hardware and fixing software since I was ten. I spent the last several years in Help desk related positions and decided I wanted something more challenging and left IT to move onto software. I have finished my computer science coursework and am now working on building a portfolio around the .NET framework and networking with other developers and am falling in love with the field all over again.

## GROUPS & ACTIVITIES:

- Salem State University Programming Club
- Boston Windows App and Game Developers
- Windows Apps – Boston Developers Group
- South Shore .NET Users Group

- Greater Boston Entry Developer
- Microsoft DevBoston
- Boston Software Craftsmanship

## SYSTEMS EXPERIENCE

C#	SQL
HTML/CSS	Visual Studio
JavaScript	

## EXPERIENCE:

### Greater Boston Entry Developers

12/2013 - Present

#### Founder / Organizer

- Creating an environment for entry developers to discuss resources, find guidance, and network in the Greater Boston Area.
- Organizing meetups, informative blog posts, an online chat platform, a website, and job listings all geared toward helping Entry Dev's find placement and make leveraging connections in the field.
- Reaching out and networking with people in the field to help this group grow and thrive.

Bachelor of Computer Science  
Anticipated Graduation 2015

### SB Sound Board (<https://github.com/dglambert/SB-Sound-Board>)

12/2013 – Present

- SB Sound Board is a proof of concept for a well-designed sound board app for Windows Phone that allows users to request and obtain audio bytes based on their needs.
- Technologies - .NET, C#, XAML, Git, Github
- Software Process – One Week Sprints, Product Backlog, TDD

### Planit (<https://github.com/Project6/Planit>)

04/2013 - Present

- Planit is a web based time management and organization tool for individuals that I am a Co-Founder of and am currently working on building the framework for and the first release.
- Technologies – HTML, CSS, JavaScript, C#, ASP.NET MVC, SQL, Azure, Git, Github
- Software Process – One Week Sprints, Product Backlog, TDD, Shared Responsibility of Product Owner/Manager between 3 Co-Founders.

**Best Buy Geek Squad, Danvers, MA**

**09/2008 – 11/2011**

**Senior “Supervisor”**

- Promoted from Technician to Supervisor after two years of employment.
- Maintained overall responsibilities of the department.
- Prevented and resolved any client issues.
- Trained incoming employees and aided continual development to achieve personal growth.
- Managed department 100% to all budgets, turn-times, and satisfaction goals.
- Assumed roles of technician and/or any other position in the store during high volume periods and absences.

**Counter Intelligence Agent “Technician”**

- Assisted clients with repairs and upgrades.
- Conducted virus removal, ran diagnostics and repaired software issues (self-inflicted and foreign), performed network troubleshooting, and replaced faulty hardware.
- Always prevented issues from escalating to my supervisors/managers, and when it did I would come with a solution.
- Answered questions on products carried by Best Buy and services offered by Geek Squad.
