

# Devin Gleason Lambert

Entry Level .Net Developer

I am a technologist at heart, a deep love for technology is how I got here. I have been dismantling hardware and fixing software since I was ten. I spent the last several years in Help desk related positions and decided I wanted something more challenging and left IT to move onto software. I have finished my computer science coursework and am now working on building a portfolio around the .NET framework and networking with other developers and am falling in love with the field all over again.

## GROUPS & ACTIVITIES:

- Salem State University Programming Club
- Boston Windows App and Game Developers
- Windows Apps – Boston Developers Group
- South Shore .NET Users Group

- Greater Boston Entry Developer
- Microsoft DevBoston
- Boston Software Craftsmanship

## SYSTEMS EXPERIENCE

C#	SQL
HTML/CSS	Visual Studio
JavaScript	

## EXPERIENCE:

### Greater Boston Entry Developers

12/2013 - Present

#### Founder / Organizer

- Creating an environment for entry developers to discuss resources, find guidance, and network in the Greater Boston Area.
- Organizing meetups, blog posts, online chat, job listings, and a website all geared toward helping Entry Dev's find placement and make leveraging connections in the field.
- Reaching out and networking with people in the field to help this group grow and thrive.

Bachelor of Computer Science  
Anticipated Graduation 2015

### SB Sound Board (<https://github.com/dglambert/SB-Sound-Board>)

12/2013 – Present

- SB Sound Board is a proof of concept for a well-designed sound board app for Windows Phone that allows users to get the clips they want.
- Technologies - .NET, C#, XAML, Git, Github
- Software Process – One Week Sprints, Product Backlog, TDD

### Planit (<https://github.com/Project6/Planit>)

04/2013 - Present

- Planit is a web based time management and organization tool for individuals.
- I am a Co-Founder and am currently working on building the first release.
- Technologies – HTML, CSS, JavaScript, C#, ASP.NET MVC, SQL, Azure, Git, Github
- Software Process – One Week Sprints, Product Backlog, TDD, Shared Responsibility of Product Owner/Manager between 3 Co-Founders.

## **Best Buy Geek Squad, Danvers, MA**

09/2008 – 11/2011

### **Senior “Supervisor”**

- Promoted to Supervisor of my own department of 15 agents at the age of 21.
- Dedicated to rebuilding Standard Operating Procedure.
- Committed not only to solving issues but delivering quality solutions.
- Built relationships with employees and coached them with their personal development.
- Delivered a team that crushed all budgets, turn-times, and satisfaction goals.
- Played roles of technician or any other position when needed.

### **Counter Intelligence Agent “Technician”**

- Maintained delightful relationships with clients while delivering otherwise bad news.
- Repaired, Upgraded, Diagnosed, and Closed Tickets simultaneously on a 25 machines bench.
- Faithfully prevented issues from escalating, and if they did I would always have a solution planned.
